

Singapore Math Grade 4 Workbook\u20144th Grade Addition, Subtraction, Multiplication, Division, Bar Graphs, Fractions, Length, Mass, Volume Problem Solving (256 pgs) By Thinking Kids The second half of the book is Thinking Kids Pre covid when my daughter attended school physically I envisioned that school would do about 70% formal instruction and I'd fill in areas 30%. The Singapore workbooks are great in helping Thinking Kids I bought this workbook to support remote learning: the school books do not have the solutions and also lack explanations and method descriptions. These Thinking Kids

Singapore Math Grade 4 Workbook—4th Grade Addition Subtraction Multiplication Division Bar Graphs Fractions Length Mass Volume Problem Solving (256 pgs) [Thinking Kids] on . Singapore Math Grade 4 Workbook—4th Grade Addition Subtraction Multiplication Division Bar Graphs Fractions Length Mass Volume Problem Solving (256 pgs) Singapore Math Grade 4 Workbook\u20144th Grade Addition Subtraction Multiplication Division Bar Graphs Fractions Length Mass Volume Problem Solving (256 pgs) Pretty good for busy summer.

It's a good exercise math book for 4th graders or advanced 3rd graders: I gave it 3 stars because it's rather boring and not challenging enough for my 4th grade son: He asked me to skip the first half of the book because he found it too easy. Now that school is virtual its like I'm doing 80% and the edu system is doing 20%: Homework is not being marked which means mistakes and areas of low understanding are not being picked up in school, Easy to understand however my kido can do this without parent help Thinking Kids I homeschool and use just this for math for the entire year: We get through it much less than 1 school year but it's plenty for our needs, Very user friendly kid friendly and it progresses on a way that makes sense. It works really well for us and I recommend it to other Thinking Kids My daughter flies through these: We are using to check for weak areas and avoid brain drain: (Nothing strenuous) I enjoy not having to work most problems out any since there is an answer key: If her answer doesn't match the key I do work the problem Thinking Kids This is one of two review supports I purchased recently for my daughter, Math is the boogey monster under her bed so to speak I think she may even like spiders then math and those she's only find of one variety the dead kind: And I noticed at the beginning of the Thinking Kids Just like math should be explained. *FREE* shipping on qualifying offers. One unit per day. Very useful for my 8 yo Thinking Kids.
