This collection of fifteen papers ranges from the author's initial interest in the Tapestry as a source of information on early medieval dress through to her startling recognition of the embroidery's sophisticated narrative structure. **The bayeux tapestry ks3** Developing the work of previous authors who had identified graphic models for some of the images she argues that not just the images themselves but the contexts from which they were drawn should be taken in to account in 'reading' the messages of the Tapestry. **The bayeux tapestry story** In further investigating the minds and hands behind this the largest non-architectural artefact surviving from the Middle Ages she ranges over the seams the embroidery stitches the language and artistry of the inscription the potential significance of borders and the gestures of the figures in the main register always scrutinising detail informatively:
