

Malaysia, Singapore Brunei By Simon Richmond This might have something to do with the book being in Kindle form for the first time for me - I found it incredibly difficult to go back and find a section I wanted and I missed flicking through a hard copy. If you're completely at a loss for what to do you can usually look to this book for some kind of idea but sadly most of the suggestions revolve around bland museums shopping and eating. If you are planning a trip to the region this book is still worthy of a purchase but be aware of its limitations and be seek suggestions from locals or other travelers for different activities. In the next edition I would like them to give much more detailed information on travelling between destinations-this often missed out basics such a duration of journey or times or details of where timetables are,

Discover Malaysia Singapore & Brunei Have your fortune told by a psychic parrot then dig into dosa in Singapore's Little India, Trek in the footsteps of tribal war parties on the Headhunters' Trail in Gunung Mulu National Park, Travel the length of Peninsular Malaysia through the world's oldest rainforest on the Jungle Railway, Give the turtles plenty of space as they haul their 750kg-bodies up the beaches of Cherating. In This Guide: Top adventure activity coverage - the best hiking snorkelling caving diving or bird-watching info: More listings of sustainable businesses to help you make the right choices for the environment. Useful as ever as a reference but I found that I used Google & TripAdvisor alongside it. 660 In my travels throughout Malaysia and Singapore I've found this book to be marginally useful: The book pays an inordinate amount of attention to Sabah and Sarawak as if jungle trekking were the only thing people come to Malaysia for. The historical treatment is quite biased to the UK perspective and also inconsistent in places, Also some of the phrases in the Malay phrase guide are wrong or else funny leading to some potentially embarrassing gaffes. 660 Note I only used this book for a trip to Malaysia (Penang) and Singapore I did not travel to or use the Brunei section: I plan to use this book again later this year for Penang and see if I like it better the second time, 660 Found this very useful for planning my way around Malaysia in particular the accommodation recommendations have been excellent. Also there should be a tube map of the LRT and central train routes of KL: It seems like fitting all three places would be too hectic in one vacation so I only visited Malaysia and Singapore: Even Malaysia and Singapore isn't that close by but you can take a train: Get ready for trying some durian and seeing many interesting places in the hot sun! 660 Curried crab: 660 great walking tours! 660 I registered a book at BookCrossing.com/journal/10465380 660 Ready for an updated version although it was good for what states I used it for.Five authors and 2731 hours in-country researching this edition.Find out how you can minimise your impact at lonelyplanet.com Malaysia Singapore Brunei

So-so. 660 A great book about Malaysia Singapore & Brunei.com!<http://www.BookCrossing.com>. 660.
