

Farming and Forestry on the Western Front: 1915-1919 (Old Pond Books) By Murray MacLean **Book Farming and Forestry on the Western front 2022** Written by a farmer it is a highly informed description with plentiful photographs of the British Army's farming and forestry efforts close to the Western Front in northern France 1915-19. **Farming and Forestry on the Western frontbenchers** A flurry of veterinary surgeons farriers etc catered to their needs and invalided or convalescent horses (eg those partially blinded by gas) were removed from the battle front and put on light farming duties:

Book Farming and Forestry on the Western front 1930

One of the best books I've read/looked at about WW1. **Book Farming and Forestry on the Western front book** A vast amount of timber was needed for reinforcing trenches creating wooden walkways and roads on muddy battlefields building huts and shelters fences railway lines etc etc: **Farming and Forestry on the Western Front epub reader** Food and fodder from farms helped feed the troops and horses which made a vast and often ignored contribution to the war: **Farming and Forestry on the Western frontbenchers** There is quite a lot about the welfare of the horses which were highly valuable assets and were never shot unless severely wounded. **Farming and Forestry on the Western frontburner d** The writers' captions to the many photographs are illuminating and informed pointing out details that only an expert in agriculture and forestry would be able to interpret accurately: **EBook Farming and Forestry on the Western front book** This book sheds a completely different light on the British Army its food and timber needs supply chains horses and the war: **Book Farming and Forestry on the Western front pdf** English MacLean Murray Farming and Forestry on the Western Front: 1915-1919 (Old Pond Books)
